

Vanilla Rice Stream

In each sentence below, two words do not make sense—but they rhyme with words that would make sense in their place. For example, “West ends are forever” doesn’t make sense, but “Best friends are forever” does. The words *best friends* replace words they rhyme with, *west ends*. In another example, “There’s a lot of water in the *Specific Motion*” becomes “There’s a lot of water in the *Pacific Ocean*.” Can you replace two words in each of the sentences below with words that rhyme with them—and that make the sentence make sense?

1. Honest people do not sell pies.
