

We have the right to education

We have the right to education

Education you open up our future

We cannot live without you, education

You are the mother of success

You give us pride and the vehicle to succeed

Education, allow me to embrace you

Because you are my hero

I also want to be a hero

Education you the key of our lives

Open the power for me to succeed in our life

You, education, education our future

All I have to do is switch on the candle light

Mzantsi is offering you for free

Let me embrace this gift that is free

One day it'll not be easy

Because it'll not be free

I thank you Mzantsi

For offering me this beam of light

I will take shelter under you education

Use you profitably for my life

Hoping that my friends will do so too

Will love you; embrace you as the light, education.
