WHICH IS THE ONE AND WHY? INSTRUCTIONS

The goal of the game is to practice some tenses, recall previous knowledge, and use the participants' personal experiences as well.

1. This simple game only requires a dice and some tiles/coins/colored clips for each player.
2. Each player throws the dice and moves as many squares as the die tells. He / She has to answer the question in the square and offer an explanation for their response.
3. There are some squares that make the player go back some places.
4. The one who finishes first is the winner.

It can be used by preintermediate, intermediate and advanced students.

You can play as many times as you want.
